

March 15-16, 2010
2 day course 8AM-5PM

THIS COURSE WILL BE HELD IN:

Sonoma Mountain Village
1300 Valley House Drive, Suite 100
Rohnert Park, CA 94928

California has a brand new greywater code, easing the way for simple, low cost, and legal greywater systems. Now landscapers, plumbers, and greywater installers will be able to recommend and promote greywater systems to clients as a great way to save water and money.

This course covers the basics of greywater-types of systems, codes, soaps and products, plants, and system design. Participants gain experience with the tools and materials required for two types of greywater systems, the laundry to landscape and the branched drain system. During the course one full greywater system is designed and installed. All skill levels are welcome, and there will be a range of activities appropriate to address the needs of different skill levels.

WHO SHOULD ATTEND

Plumbers, Landscapers,
Homeowners, Code Inspectors,
Environmentalists, Auditors,
General Contractors, Auditors

COST

\$395

WHAT YOU WILL RECEIVE
